

CI/CD

How can automation makes us part of the cool kids?

Saves money

- Less customers complaining about bugs
- Less time testing
- No waste of money with unused resources
- Less human errors

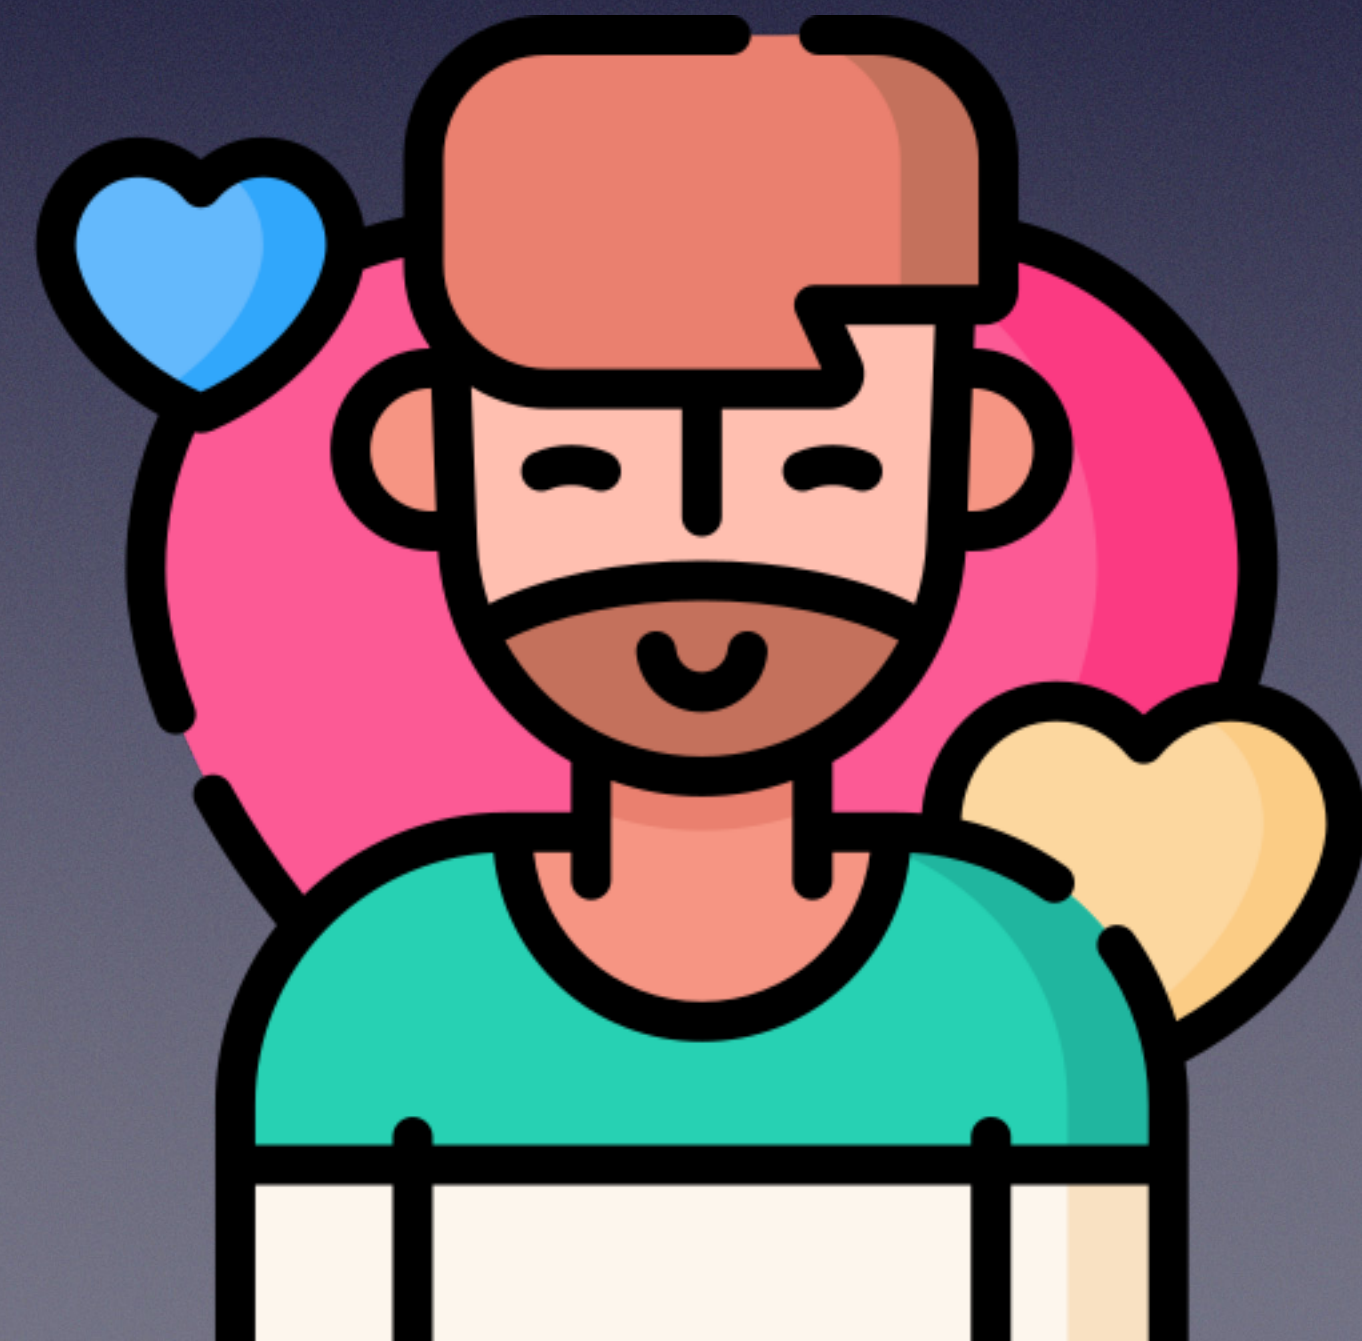

Protects what we love

- We can undo a system outage as fast as a ctrl+z
- Less production downtime

People will fall in love

- Exciting features can be released everyday
- Less time to enchant our customers

Development levels up

- Engineers can focus on coding
- No more painful and boring processes
